

NKOSINGIPHILE NKABINDE

Aspiring Data scientist & Software Developer

I am a dedicated and hardworking technology professional who has proactively built a strong foundation in IT support and cloud computing through self-teaching, real-world experience, and recognized certifications. My journey reflects a determined commitment to continuous learning and growth, having gained practical expertise in managing Microsoft Azure environments, automating cloud operations, troubleshooting complex technical issues, and delivering excellent customer service—all without a formal degree.

My life experiences have significantly shaped my professional capabilities, work ethic, and approach to challenges in the technology field. Through diverse roles and self-driven learning, I have developed resilience, adaptability, and a strong determination to succeed—qualities essential in IT and cloud services.

Having worked in various positions, including sales assistant and Junior Cloud Administrator, I refined my communication and customer service skills, learning to engage effectively with different people and solve problems empathetically. These experiences fostered patience and clarity when addressing technical issues or collaborating in teams, critical for client-facing and support roles.

Choosing to be self-taught and achieve certifications despite not holding formal degrees demonstrates my discipline, persistence, and resourcefulness. I have taken initiative, managed time effectively, and overcome obstacles in fast-paced technology environments.

Practical experience from internships and hands-on roles helped me build confidence in cloud infrastructure management, automation, and security, while emphasizing the importance of documentation, teamwork, and clear communication for operational excellence and knowledge sharing.

Overall, my life experiences have fostered a results-driven mindset that enables me to handle complexity, quickly learn new technologies, and maintain a positive, solution-oriented attitude. My combination of practical skills, perseverance, and willingness to go the extra mile positions me as a dependable and valuable professional ready to contribute meaningfully and advance in IT and cloud services careers.

PROFILE

Motivated and versatile technology enthusiast, passionate about solving real-world problems with code and data. Experienced in Python, cloud platforms, automation, and teamwork. Certified by Microsoft, AWS, and IBM, and excited to grow as an impactful data scientist and software developer.
